

PRESS RELEASE

Euroboor Unveils the All-New TUBE.55-T Magnetic Drilling Machine

Safer Drilling With The Brand New Integrated GYRO-TEC Functionality

Zoetermeer, Jan 1, 2018 – Euroboor expands the TUBE-Series with the all-new [TUBE.55-T](#). This magnetic pipe drilling machine can drill up to 55 mm ($2^{3/16}$ inch) holes on curved and flat surfaces. Previously it was only possible to drill holes up to 30 mm ($1^{3/16}$ inch) with the well-known ECO-TUBE.30 that recently changed its name to [TUBE.30](#). The TUBE.55-T will be available as from February 2018 and comes with a brand new feature called *GYRO-TEC* which makes your drilling job much safer.

What is GYRO-TEC

Whenever the machine recognizes a sudden, unwanted movement, the motor will be shut down automatically by the machine electronics. GYRO-TEC is powered by a state of the art gyroscopic sensor, detecting displacement in any direction. This safety functionality offers protection to the user in various circumstances, such as:

- Sudden loss of magnetic force while in operation
- Excessive vibration caused by incorrect drilling procedure, worn-out cutting tools, etc.
- Sudden displacement of the workpiece to which the magnetic drilling machine is attached.

Product	Annular Cutters	Motor Power	Available
Euroboor TUBE.55-T	Ø12 – 55 mm ($1/2$ "- $2^{3/16}$ " ⁶)	1600W (14.5A)	Mid-January 2018

About [Euroboor](#)

Euroboor, manufacturer and distributor of Industrial Portable Tools is established in 1977. With 5 branches throughout the world and a large international and local dealer network Euroboor is actively involved in 71+ countries worldwide. Our product range is in-house designed & engineered with the highest quality standards by selecting grade A parts only to achieve the best performance.
